Installation

- 1.) unzip the contents of the zip file to a temporary folder.
- 2.) Copy and paste the folder EDDF_V3 and its sub folders to FSX/Addon Scenery
- 3.) Open the scenery library and add the folder EDDF_V3 and set it active.
- 4.) uncheck all other scenery folders with EDDF scenery.

AI-Traffic,

I have made this scenery for my own purpose and that is flying online with IVAO or VATSIM. So I don't need AI traffic. That is why I have not taken care of these functions and I cannot say if and how it is working in that scenery.

Changes to previous version

I have corrected some taxiway signs and added new apron lighting to the aprons. Added ILS Y to RWY07L-25R and added Terminal A plus.

Credits

Many thanks to **Bill Leaming** for the permission to use his **RampLight_Library**

And many thanks to the programmers of the following software: **ADE Airport Design Editor, ModelConverterX, Wishplacer, Library CreatorXML.**

These tools make scenery design much easier.

Finally

I hope you enjoy the scenery. If you have questions or suggestions for improvement please let me know.

Have fun and happy landings
